

“Inspirational Homes & Community Spaces mean a more Inspired & Socially Engaged Community”

Sustainable CEO, Brett McKenzie

“Recipe on Crowley”

A different approach for small development.

- Bespoke Design
- Climate Responsive
- Resource Friendly
- Connected to the Land
- Affordable Build Approach

Sustainable’s latest project in Zillmere, “Recipe on Crowley” shows its possible to embrace old Queensland values and life style and bring it into the 21 century. Respectful, design lead and considered lifecycle modelling, has created a cluster of housing that offers a selection of different home size options. Against the main stream “one fit for all” these three homes deliver a strong focus on modern subtropical lightweight construction providing something unique and individual, but respectful to each other in regards to orientation, borrowed landscape, privacy, common spaces and vistas.

At *Sustainable* we seek to challenge the status quo and provide long term sustainable solutions.

Experience it yourself
